5/6 September 2014

G-MEA Training Center in
Byblos - Lebanon

Please send application or registration to:
info@G-MEA.com

DEAR COLLEAGUES IN LAPAROSCOPIC AND VISCERAL SURGERY

it is our great pleasure to invite you to Lebanon for our laparoscopic Hands-on Workshop. G-MEA stands for General Medical Workshop Association Middle-East and Africa and it expresses a new concept of an educational forum for laparoscopic surgery and endoscopy.

The spirit of this innovative approach to education is best reflected by the fact that this meeting will combine workshops on Hands-on training, as well as scientific sessions.

The ability to train on Hands-on models and apply these new techniques to clinical practice is the primary goal of this Workshop.

Together with our partners from the industry we are committed to providing high quality education and training for all participants. Trained by professional experts in their field, you will have the exclusive opportunity to learn and be taught in basic and innovative techniques of laparoscopic surgery and to see established methods from a perspective you have never experienced before.

G-MEA seminars and workshops offer an experience which covers the whole of modern laparoscopic surgery techniques in an exciting social environment, designed to extend our knowledge, improve our practice and widen our friendships.

Welcome to Lebanon!
