

# Endoscopic Management of GERD and its complications (Bleedings and Tumors)

**1<sup>st</sup> Announcement**

Dear Doctor,

We are pleased to announce the “NEXT Endoscopy Workshop” that will be held in Dubai, May 2015.  
This unique educational day will present updates on  
***“Endoscopic Management of GERD and its complications: Bleedings and Tumors”.***

The purpose of this course is to provide a state-of-the-art update on advancements in diagnosis and therapeutic endoscopy to gastroenterologists. Through lecture, case study discussion and Hands-on training, participants will refine their skills in various endoscopic techniques that are incorporated into their day to day clinical practice.

The hands-on workshop is aimed to provide an opportunity for participants to get practical exposure to different endoscopy techniques under the direct supervision of international experts. The different stations will include enteroscopy, dilation & stenting, clippings, management of GI bleeding, closure of perforations, EMR (Endoscopic Mucosal Resections), ESD (Endoscopic Submucosal Dissections) and understanding the settings of the electrosurgical generators. Participants will be divided into small groups to allow enough time for each gastroenterologist to practice these techniques.

*The detailed agenda, dates and venue will be communicated soon.*

According to the PhRIMAG Gulf Code of Marketing Practices, spouses, family members or other guests of Healthcare Professionals must not attend any portion of the meeting, and they are not allowed to be present at meals.
