On Advanced Techniques in
Gastrointestinal Endoscopy
C.M.E Credits

Dear Colleagues and Friends,

It is our great pleasure to invite you to Nabatieh and the 1st South-gastro-club workshop and gastro-science seminar. SGC workshop a new concept of an educational forum for endoscopy and also the growing field of gastroenterology. The spirit of this innovative approach to education is best reflected by the fact that this meeting will combine hands on-courses on biotissue models as well as scientific sessions to enhance knowledge in gastroenterology. To meet the goal and aims of SGC workshops will focus on hands courses trained by professional experts in their field :

- to provide the necessary knowledge to make some progress in the field of gastrointestinal interventional endoscopy
- to describe the technical steps which are used for advanced endoscopic procedures
- to describe results and potential complications, and how to prevent them
- to practice on live tissue in order to give the participant the technical capacity to improve his/her expertise.

GCS workshops and gastro-science seminar offers a congress that covers the whole of modern gastrointestinal endoscopy in an exciting social environment designed to extend our knowledge, improve our practice and widen our friendship.
