University Hospital Tübingen, Germany

Birgit Sandhöfner
ERBE Elektromedizin GmbH
Germany

WITH KIND SUPPORT FROM:

LEMKE

DEAR COLLEAGUES IN UROLOGY

En bloc resection of tumors of the bladder using HybridKnife is a new surgical procedure that allows recently discovered cancer of the bladder to be effectively treated. As the tumor is not dissected in the bladder, this procedure enables a precise pathological diagnosis of the tumor margin as well as deep infiltration of the tumor.

Accordingly, resection using the HybridKnife enables: complete resection of the entire carcinoma with a reduced risk of cancerous cells remaining behind in the bladder so that follow-up procedures are avoided and the risk of injury to the bladder is minimized.

We are pleased to offer you a workshop about this new state of the art technique and looking forward to welcoming you in Southafrica!

Tuesday 21/07/2015

- 09:00 Welcoming
- 09:15 Introduction of new Instrumentation in Urology (Principle of Waterjet)
Mrs. Birgit Sandhoeffner
- 09:45 State of the Art in Partial Nephrectomy with Waterjet Technology
Georgios Gakis, M.D.
- 10:15 Coffee break
- 10:45 En Bloc Resection of Bladder Tumors using the Waterjet Technology (Advantages, Indication, Procedure)
Georgios Gakis, M.D.
- 11:15 Hands-on session
 - En Bloc Resection
 - Bipolar Resection
 - Open Surgery
- 13:00 Lunch
- 14:00 Hands-on session
 - En Bloc Resection
 - Bipolar Resection
 - Open Surgery
- 16:00 End of the workshop

Wednesday 22/07/2015

- 09:00 Welcoming
- 09:30 Live Transmission from the Operation room to the lecture hall
