Endolive Beirut 2015

Central Military Hospital

16 -18 April, 2015; Beirut - Lebanon

Dear colleagues,

We are pleased to announce the first Endolive Beirut 2015, which will be held on April 16-18, 2015, in the Central Military Hospital-Beirut in collaboration with the G-MEA Centre-Byblos.

Hands-on training on G-MEA BIO-Tissue models will take place in the G-MEA Centre-Byblos on Thursday April 16, 2015. The hands-on workshop is aimed to provide an opportunity for participants to get hands-on exposure to different endoscopy techniques under the direct supervision of international experts. The different stations will include enteroscopy, dilation and stenting, clippings, management of GI bleeding, polypectomy, closure of perforations, EMR, ESD, and understanding the settings of the electrosurgical generators. Participants will be divided into small groups to allow enough time for each participant to practice these techniques at the different stations.

The Live endoscopy sessions will take place in the Central Military Hospital, and will be transmitted to Monroe Hotel- Beirut, on April 17 and 18, 2015. The Live sessions will cover topics including basic and advanced endoscopic procedures such as management of upper and lower GI bleeding, small bowel bleeding, ERCP, EUS-FNA, POEM, EMR, ESD, stenting, dilation, virtual chromoendoscopy, small bowel enteroscopy and many other interesting procedures.

The purpose of this course is to provide a state-of-the-art update on advancements in diagnostic and therapeutic endoscopy to gastroenterologists. Through Hands-on training and live endoscopy cases, participants will refine their skills in various endoscopic techniques that can be incorporated into their clinical practice.

Join us in Byblos and Beirut on April 16-18, 2015 for an interactive and challenging workshop, exploring the world of GI endoscopy.
